

AN INTERVIEW WITH..

... Roland Dangerfield of Sentinel Aviation

Flying private, whether jet or helicopter, has never been so popular, and business is booming. We ask Managing Director, Roland Dangerfield, for his thoughts and views.

PRIVATE JET & HELICOPTER CHARTER

WHY FLY PRIVATE?

"Flying privately for business, holidays or to an event such as the Football World Cup Finals in Qatar, has never been so popular or affordable, and it truly elevates your trip.

When you charter your own plane or helicopter, you receive the luxury of comfort, privacy and security, flexibility and convenience.

You just don't get this attention to detail when flying commercially - especially in today's climate of restrictions and disruptions."

IS IT EXPENSIVE?

"There is no doubt that flying privately can be extremely expensive, but Sentinel Aviation believe that with some forward planning and 'economies of scale', sensible prices can be achieved.

We recently flew a party of eight from Farnborough airport to Madrid; they were to spend four days partridge shooting in Ventosilla. The cost was £2000 per head. I think that is pretty reasonable. And remember, with increased demand comes competition!"

WHY SENTINEL AVIATION?

"Because we're simply the best at what we do! I'm a former business jet pilot, so I'm fully aware of all the pitfalls and challenges that come with flying privately around the world to far flung destinations.

This personal experience affords me and my team unparalleled insider knowledge and advice for our clients. When it comes to selecting the right aircraft, airport and departure or arrival time, it means our service is taken to a whole new level. Why not give us a call and let's discuss your next trip!"

“The crew, plane and ground experience were all excellent and dovetailed perfectly with our vehicles and people at both ends. This is a setup we will definitely be using and recommending to friends and family.”
